

# AAKARSH PATHAK

## SOPHOMORE

### Summary

As a sophomore at MITBLR with a strong passion for coding and a creative flair for design, I am on a multi-faceted journey to explore the dynamic intersection of technology and art. Coding has provided me with the tools to build functional, elegant solutions, while my graphic design skills enable me to enhance user experiences through visually appealing and intuitive designs.

In addition to my coding projects, I've dedicated time to honing my graphic design capabilities. Whether it's crafting eye-catching user logos or designing visually engaging posters, I understand the importance of aesthetics in the digital world. I believe that the fusion of coding and design can lead to more impactful and memorable digital experiences.

### Employment

<b>Antaris Inc.</b> Intern	Pune May 2023Julyto 2023
-------------------------------	-----------------------------

Dev Ops: Linux, Docker.

### Projects
